All enrollments are as of the third Friday in September. The public school enrollment projections are based upon trends observed in the number of students moving from grade to grade. The trend, calculated as an average cohort survival ratio, was used to estimate enrollments for first through twelfth grade. Kindergarten enrollments were estimated from an average ratio of kindergarten enrollments to the cohort born five years prior.

'Certified Item 7' was taken from the Certified Enrollment form as reported to the Division of Financial and Information Services.

'Other' refers primarily to special education students not associated with a given grade level. This is not a count of the number of special education students in the state. Due to the continuing trend of districts reporting special education students within specific grade levels, fewer special education students are represented in the 'other' category in recent years. Beginning in 2004-2005, districts report all special education students within a given grade level. 'Other' also contains full time equivalent (FTE) of tuitioned out resident public students to a community college and FTE of shared-time students attending nonpublic schools located within a public school district enrolled for instructional services.
